

HIGH SCHOOL
PROGRAM OF STUDIES
2015- 2016

Grafton Integrated Health Network

High School English Class - Berryville

Dear Students and Parents:

This handbook has been prepared to help Grafton high school students and their parents explore the course options that are offered by our school.

Please go over this guide carefully and discuss it with your current teachers, case managers, and Principal. Your future in school and your future after graduation depend on the choices you make now.

It is very important that you use the forms in this guide to develop a four year course of study. Make sure that you choose courses that will fulfill the requirements of your state. Many of the students in our program will have an Individual Education Plan (IEP) and the courses taken for high school credit will be included in your plan. Remember that every course for high school credit will become part of your transcript and your grades will go with you to any high school you attend after you leave Grafton.

We have been very pleased that some students graduating from Grafton have chosen to go on to community colleges. Whether you hope to go on to college or to begin working in the community, you will need to choose carefully so that you will be well prepared for your future.

We hope for the very best for all of our students. We want to help you succeed now and in the future. Choose courses that will help you reach your goals!

Best wishes,

James G. Gaynor, II
President/CEO

Grafton High School Program of Studies Guidelines and General Information

The Program of Studies is a guide for students and parents to describe course offerings and services at Grafton High School. We strongly encourage you to study this text prior to pre-registration. We also suggest that parents and students meet with each other and their home school guidance counselor before planning an individual program of study.

You will notice that many of the courses have prerequisites; therefore, you need to do some long-range planning rather than taking a year-by-year approach. Eighth graders should plan a four-year course of study. In choosing courses, please think about your interests, strengths and goals. With proper planning, all required courses are completed.

Proper planning also includes consideration of alternative course selections. Courses with low enrollment will either be combined or cancelled. Schedule conflicts may prompt alternatives.

License

Grafton High School is licensed by the Virginia Department of Education.

Diploma Programs and Policy

Although Virginia, West Virginia, Maryland and District of Columbia high school diploma requirements are described in the Program of Studies, students from any state may enroll in Grafton's High School program and earn credit. Specific state requirements will be reviewed and, when possible, special class modifications will be made.

The student's local school system usually awards the student with a high school diploma from their home school upon completion of the required credits. Grafton will, however, award a 20 or 22 credit high school diploma in agreement with the Virginia Graduation Requirements if no home school district can be identified. These credits would also apply to a 26 credit advanced diploma, as appropriate.

Unit of Credit

The standard unit of credit for graduation for all students shall be based on a minimum of 140 hours of instruction for students from Virginia and 120 clock hours for students from Maryland. In the Berryville, Richmond and Winchester schools, Grafton has a 223 day school year which provides ample opportunity for students to earn credit. Units of credit are earned in one-half units (a minimum of 70/60 clock hours). Students receive one-half unit of credit for each semester course successfully completed. Students receive one unit of credit for each full year course successfully completed. A student earning an "F" in the first semester and a "C" in the second semester will have those two grades averaged for that particular course.

Grading Scale

All courses will be graded using the Grafton grading scale at the Berryville, Richmond, and Winchester schools:

A	90 - 100
B	80 - 89
C	70 - 79
D	60 - 69
F	<59
I	Incomplete

Grafton has three classifications of courses. They are as follows:

Integrated: (VAAP)	Course content has been adapted to the performance of the student based on the Integrated Standards of Learning
Modified: (Standard Diploma)	Course content satisfies the standards for A modified standard diploma in Virginia
General: (Standard Diploma)	Course content and student performance corresponds with the student's grade level

Report Cards and Transcripts

Report cards are issued to students, parents/guardians and funding agencies six times per year at the Berryville, Richmond and Winchester schools. Final letter grades are recorded on the student's permanent record (transcript), which is sent out at the time of discharge with the student's discharge summary.

Honor Roll

The Honor Roll shall consist of those students with an A or B average. (An Honor Roll student may not have an "A" balance out a "C" due to the wide grading scale). Students attending local high schools will have these grades included in their average. Grafton's Honor Roll is celebrated at the conclusion of every reporting period.

Transition into Regular Education

Students who qualify are eligible to enroll in course work and earn credit from a local public high school. When this option becomes a possibility, students may preview and select courses from the public school Program of Studies.

Attendance Policy

Good attendance is key to maximum benefit from an educational program. All students are expected to attend school regularly and to be on time. Students and staff should accept the responsibility for regular attendance. Regular attendance aids in the development of good habits of punctuality, self-discipline, and responsibility. Students must have good attendance if they are to benefit from such activities as:

1. Classroom lectures
2. Special instructions and individual help in skill development
3. Classroom group discussions
4. Performance tests
5. School-related, co-curricular activities

Unlike traditional schools, Grafton's High School year continues throughout the summer, providing a possible total of 223 academic days. Due to the unique situation of a residential school serving special students, a number of days are understandably lost as a result of behavior, family visits, etc. However, it is important that students remain on task as much as possible. In many cases when a high school student leaves Grafton, the discharge will either be at the end of a regular school year (June) or at the mid-semester break (January). If possible, students enrolling into a public school setting will also end or enter at those times.

Students enrolled in grades 9 - 12 who are absent more than five times during the grading period shall be requested to attend an attendance review. Possible outcomes of this attendance review might include a failing or incomplete grade as decided by the Attendance Committee (composed of the Education Administrator, Academic Teacher, and Case Manager).

Students shall not receive credit for any high school courses for which they are absent more than 24 class periods for an annual course or more than 12 class periods for a semester course, unless circumstances have been documented. An Attendance Committee shall determine the appropriate course of action on an individualized basis.

Length of School Day

The school day at all Grafton programs will be 5.5 hours at minimum with additional time based on the number of credits being earned and required clock hours by state. Individual programs at different locations may vary in start and close times, five days per week with the exception of planned breaks and holidays. Please check with the Education Administrator for the related school for scheduling details.

Students may enroll in a maximum of six, one-credit classes. The typical high school student earns between five and six credits per semester.

Late Enrollment

Many high school students enroll at different times during the school year. The student may earn full credits in some courses because the individualized nature of our program allows the student to reduce the total number of courses taken and

double up on course clock hours. Grafton School also provides 220 plus academic days.

Those students who transfer in from another school placement shall be awarded days and grades according to the records from the prior school placement.

Functional Course Work and Career and Technical Education Graduation Requirements

Description of Functional Courses

Functional Curriculum Program

This program is designed for the student who needs a highly specialized learning environment for functional life-skills instruction and has an Individual Educational Plan (IEP). Courses in math, language arts, career and technical education, history/social science, science, and life skills management are taught. Courses are constructed to meet the individual student's IEP goals. Student will participate in learning similar to the general curriculum in a variety of settings and with appropriate supports.

The student may spend a portion of each school day in career and technology training as called for in the IEP: job coaching experiences, vocational training opportunities, and/or supported internships. These work experiences may be in school or community-based.

In accordance with the 1997 amendment to the Individuals with Disabilities Education Act (IDEA), students who are unable to participate in the Standards of Learning Assessments, even with accommodations, will participate in an alternative assessment. The purpose of the Virginia Alternative Assessment is to evaluate the performance of students who have traditionally been exempt from state assessment programs. The Alternative Assessment was developed with the belief that these students are a part of our accountability system and that the evaluation of their achievement represents an important component of the high standard. In the 11th grade high school students will be given the Virginia Alternative Assessment.

Integrated Mathematics

Math is designed to meet the individual needs of each student by focusing on money management, telling time, and measurement. The student will learn functional math skills for purchasing, budgeting, and banking.

Integrated English

Language Arts is designed to meet the individual needs of each student by focusing on reading, decoding, and comprehension skills. It will also include functional sight word vocabulary, handwriting, composition of short notes and letters, job application forms, and oral communication skills.

Integrated Career and Technology Training

Training is designed to meet the individual needs of each student by focusing on work readiness skills, such as personal appearance, manners, following directions, social skills, telephone etiquette, using classified ads, simulated work activities, and leisure skills. Work experience is designed to meet the individual needs of each student by focusing on career goals for post-high school employment. Students might participate in one or more of the following work experience options as a part of their IEP: job coaching experiences, vocational training opportunities, and/or supported internships. These work experiences may be in school or community-based. Career and Technical Education includes an embedded curriculum in areas of specialty.

Examples of Embedded Curriculum in the Career and Technical Education Areas of Specialty

Linens Service: Students will be receiving training in several areas including sorting linens/clothes, measuring and using detergents, operating machinery, folding clothes/linens, and hanging items on garment racks

Students are instructed in **reading** skills by:

Reading sequential picture directions to wash and hang towels, linens, and clothes correctly.

- Developing laundry/linen sight word vocabulary through identifying laundry detergents, chemicals, and washing directions.
- Reading and following written directions on detergent containers, such as bleach and LemonOne spray.
- Reading washer and dryer operation manuals and following the steps, such as wash, dry, tumble, and agitate.

Students are instructed in **writing** skills by:

- Writing laundry sight words and vocabulary, such as clothing size, dry, wash, hot, cold, etc.
- Recording inventory of towels, linens, and clothes.
- Writing work orders, such as Pick up Room 106 Laundry and Return by 12:00 p.m.
- Written correspondence to customers, i.e. Identification Tags, Invoice Notes, and Special Cleaning Instructions

Students are instructed in **mathematic** skills by:

- Sorting, counting, and tallying towels, linens, and clothes by color and object.

- Counting sets of towels, linens, and clothes orally and tell how many are in each set.
- Measuring detergents and cleaners given various measuring devices.
- Predicting time to complete wash and dry cycles, expenses, high volume day, seasons
- Calculating income, expenses, loss and profit

Students are instructed in **science** skills by:

- Selecting different wash and dry cycles based on laundry type, hot, warm, cold
- Sorting laundry by textures, colors, size and weight, and organizing linens through use of positional words, such as beside, near, above, below, next to.
- Recycling everyday materials such as cardboard, water and plastic containers, and water.
- Identifying chemicals, following safety protocols, and demonstrating proper use of chemicals to wash and dry laundry.

Students are instructed in **social science** skills by:

- Increasing awareness of different community expectations
- Differentiating between job and leisure time
- Taking responsibility for job duties
- Following workplace rules and guidelines
- Practicing safe work behaviors while using chemicals and machines, such as keep hands away from moving parts, do not ingest detergents, and respect the equipment.

Examples of Embedded Curriculum in the Career and Technical Education Areas of Specialty

Clerical: Students will be receiving training in several areas including operating machinery such as a paper shredder and copier, collating, packaging, mail delivery, recording inventory, and labeling.

Students will be instructed in **reading** by:

- Reading sequential picture directions to complete office tasks, such as assembling mailings, sending faxes, and packaging items for delivery.
- Developing clerical sight word vocabulary, such as paper, envelopes, packaging, copying, delivering, and shredding.
- Identifying common office signs and logos, such as Safety, Exit, Bathroom, Office, Cafeteria, Storage, etc.
- Reading and following directions on the copy machine, printer, and shredder.

Students are instructed in **writing** skills by:

- Using common office ink stamps to validate materials.
- Completing fax coversheets
- Recording inventory of mailings, packages and other office materials.
- Creating labels, addressing envelopes, taking phone messages, inventorying office supplies and tracking deliveries through electronic devices.

Students are instructed in **mathematics** skills by:

- Sorting office files by color, number, letter, or code.
- Counting sets of packages, pamphlets, and collated materials orally and telling how many are in each set.
- Counting and tallying office supplies and graphing inventory and expenses.
- Reading clocks (analog or digital) and delivering packages on time to designated locations.

Students are instructed in **science** skills by:

- Using machines to perform clerical tasks (scissors, tape dispenser, stapler, hole punch, etc).
- Predicting machine type for different tasks – Use stapler to hold papers together at the top
- Using electronic machines (such as a digital scale) to weigh and package products in containers, boxes, or bags.

Students are instructed in **social science** skills by:

- Using simple pictorial maps to locate offices and classrooms when delivering mail or packages.
- Practicing customer service skills by being punctual to work, greeting others, and being organized.
- Taking responsibility for job duties and following work place rules and guidelines.
- Practicing safe work behaviors in a group work settings and non classroom settings

Examples of Embedded Curriculum in the Career and Technical Education Areas of Specialty

Industrial Arts: Students will be training in several areas including tool identification and use, measurement, reading, and interpreting diagrams, wood assembly, sanding, painting, drywall repair, window pane repair, door hardware installation, pipe coupling assembly, and sprinkler unit assembly.

Students are instructed in **reading** skills by:

- Identifying common safety signs and logos within a working environment, i.e. Danger/Keep Out, Caution, Hard Hat Required, Protective Eyewear Required, Slippery When Wet, etc.
- Reading high frequency sight words located within an assembly manual and following written directions to assemble and repair simple and complex projects, such as bird houses, door knobs, and toolboxes.

Students are instructed in **writing** skills by:

- Writing measurements
- Developing lists of needed project supplies
- Keeping progress notes on working projects
- Inventorying materials

Students are instructed in **mathematics** skills by:

- Counting, identifying, matching and creating sets of like items to complete assembly and packaging tasks, such as nails, nuts and bolts, and hinge parts.
- Learning estimation techniques when measuring length.
- Solving simple and complex math computations during construction projects, such as measuring lengths of materials required for projects and taking inventory to create materials lists.
- Applying fractional concepts to convert decimals, measurements, and mixed numbers when reconstructing small projects into a large scale project.
- Drawing angles, parallel lines, and points to design a drawing that can be made into a three dimensional project, such as a toolbox or flower box.

Students are instructed in **science** skills by:

- Describing the similarities and differences between various chemicals, such as paint, drywall, and glue.
- Sorting and classifying nails, bolts, screws, and washers by sets and subsets, according to size, shape, texture, color, and operational use.
- Demonstrating that different tools require different motions to work properly, such as pushing, pulling, twisting, and turning.
- Using simple tools (i.e. screwdrivers, hammers, and pliers) to make small repairs.

Students are instructed in **social science** skills by:

- Following established work and safety rules when using power tools, such as electric sanders, screwdrivers, battery operated scissors, and power drills.
 - Following routines to complete simple and complex projects, such as home repairs, furniture refinishing, and product assembly, including light fixtures and sprinkler units.
-

Examples of Embedded Curriculum in the Career and Technical Education Areas of Specialty

Horticulture: Students will be receiving training in several areas including planting, plant care and maintenance, inventory, charting data, measurement, and chemical identification and use.

Students are instructed in **reading** skills by:

- Developing horticulture sight words such as water, soil, light, and grow to help grow and maintain plants and other forms of vegetation.
- Organizing daily growth information onto charts, graphs, and maps to determine successful growth and areas of need.
- Applying categorizing techniques by alphabetizing seed packets, and labeling and sorting plants, seeds, and other forms of growing products.
- Using magazines relating to the field of horticulture to develop care cards, growth instructions, and sale promotions.

Students are instructed in **writing** skills by:

- Demonstrating appropriate spacing, letter formation, and editing skills by keeping daily observation logs of plant care.
- Producing informational cards for cultivated plants.
- Writing receipts for sales
- Keeping science journals that include labeled diagrams of plants and recorded hypothesis and predictions of plant success and growth.

Students are instructed in **mathematics** skills by:

- Learning that plants may need more or less water, minerals, and soil, depending on the season, weather and amount of sunlight available.
- Identifying numbers and counting to fulfill order requests for plants and vegetables.

- Developing an understanding of measurement and ratio through the use of water and chemicals, such as pesticides and plant foods.
- Using measuring devices, such as tape measures and rulers to monitor root depth, plant growth, and plant expansion.
- Calculating square footage by placing appropriate distances between seedlings.

Students are instructed in **science** skills by:

- Sorting vegetation according to plant size, type, and color.
- Recycling and reusing soil, water, and plants to help the environment
- Sprouting seeds, growing plants, and making observations of cells on slides.
- Understanding how plant life adapts to their environment by modifying and monitoring light, water, temperature, and food access.
- Tracking weather patterns and documenting the impact on the life cycle of plants.

Students are instructed in **social science** skills by:

- Drawing and labeling bed layouts for plant growth through creation of maps of garden areas.
- Developing sequences of plant life and interpreting the past, present, and future of plant life cycles.
- Understanding that customer supply and demand / needs and wants drives the types of produce that is grown and sold.

Examples of Embedded Curriculum in the Career and Technical Education Areas of Specialty

Food Preparation: Students will be training in developing and following recipes, cooking, inventory, shopping for ingredients, measurement, utensil identification and use, reading labels, charting data, operating appliances, and comprehending temperature components. The core curriculum subjects are embedded in the following areas:

Students are instructed in **reading** skills by:

- Reading and speaking high frequency words related to the food service industry, such as chop, mix, stir, boil, and measure.
- Developing grocery lists from recipes.
- Reading, interpreting, and demonstrating an understanding of nutrition labels, serving size, and recipes to maintain a healthy lifestyle.

Students are instructed in **writing** skills by:

- Using pictures and letters to write food words to create grocery lists.
- Creating recipes cards, grocery lists, and food storage guidelines.
- Planning menus for small and large scale events.

Students are instructed in **mathematics** skills by:

- Identifying and describing various characteristics, such as shape, color, texture, and size of foods found in a grocery store
- Preparing utensil packets for lunch servings by counting and grouping materials in sets of three and four.
- Demonstrating that healthy meals should include more or less of a specific food group, such as grains, oils, and milk products.
- Setting digital and analog clocks to monitor baking and cooking times.
- Calculating and tallying calories per meal to help develop a healthy menu.
- Using math computations and fractions to adjust individual recipes to create multiple servings.
- Utilizing a digital scale to measure and serve healthy meal proportions.
- Reading a Fahrenheit thermometer to ensure storage and cooking temperatures meet national food guidelines.

Students are instructed in **science** skills by:

- Identifying positional words, such as beside, below, near, and next to when storing foods and stocking shelves.
- Manipulating basic properties of water and other liquids by freezing, boiling, and refrigerating liquids
- Accurately measuring wet and dry ingredients using a variety of tools, such as measuring cups and utensils to create small snacks and large menus.

Students are instructed in **social science** skills by:

- Sequencing picture cards of food preparation to demonstrate an understanding of past, present, and future.
- Describing different cultural foods by matching them to their geographical origin or location.

Examples of Embedded Curriculum in the Career and Technical Education Areas of Specialty

Coffee: Students will receive training in simple marketing practices, positive customer service strategies, operating machinery, measurement, inventory, operating cash register, and coffee product knowledge. Students will have the opportunity to learn the basics of a coffee shop operation as well as the daily operations of a business.

Students are instructed in **reading** skills by:

- Identifying and utilizing common coffee house vocabulary, such as brew, pour, serve, decaf, regular, creamer, etc.
- Creating sales promotions through the use of a display board and development of advertisements.

Students are instructed in **writing** skills by:

- Taking customers orders.
- Creating promotions for coffee sales through designing advertisements.
- Updating the daily coffee specials board to reflect types of syrups, specialty coffee, and flavored creamers.

Students are instructed in **mathematics** skills by:

- Identifying money and calculating change, using a calculator or cash register.
- Tallying, counting, and graphing the daily number of customers.
- Using measuring devices to measure coffee grinds and water as well as making appropriate conversions for different styles of coffee.
- Budgeting and counting inventory of supplies, such as creamers, sugars, cups and lids, and processing orders for additional purchases.
- Graphing sales, profits and losses to display trends and make predictions about future sales.

Students are instructed in **science** skills by:

- Using their senses by smelling, touching, tasting, and looking at the coffee, Airpots, and brewer to determine if brewed coffee is ready for sale.
- Observing how physical properties of coffee, water, and condiments change under different conditions, such as wet, dry, hot, cold, mixed, and unmixed.
- Measuring the coffee and hot water temperature in Fahrenheit to ensure it meets quality standards.
- Using simple and compound machines, such as Airpots, coffee brewers, and pumps to prepare a cup of coffee or hot tea.

Students are instructed in **social studies** skills by:

- Utilizing personal greetings, manners, and acts of service by preparing and delivering coffee to customers.
- Engaging in daily routines of setting up the coffee brewers, setting up the shelves for condiments, and taking inventory.
- Identifying and recognizing that individuals work to earn money in order to buy preferred merchandise.

Health & Physical Education

Physical Education is designed to meet the individual needs of each student by focusing on personal health, physical strength, agility, individual and team sports and lifetime fitness. The course seeks to involve, adapt, modify, or change a physical activity so it is appropriate for the person with a disability. Physical Education also helps students with disabilities develop their fine and gross motor skills.

General Music

This course is designed to meet the individual needs of each student by focusing on the various ways that we use music in our lives. Different areas covered in this course include music as an expression of who we are, music to let us create, music to understand life's meaning, and music to describe the age. Theory, history, appreciation, and performance is integrated to help understand the relationship between music and other disciplines. Each student taking this class is encouraged to experience music individually and in a group setting. Skills such as following directions, teamwork, respect for others, use of technology, and care of musical instruments will be emphasized while understanding how music can be used and enjoyed in everyday life. Students will also develop skills for relaxation, leisure, anger management, exercise and spontaneous expression.

 P = Pass F = Fail

Special Diploma

Students receiving Special Education services in Virginia who do not pass the Standards of Learning and/or verified credits, but who do complete the requirements of their Individualized Education Plan, shall be awarded a “Special Diploma.”

State Assessment Required

All Students must participate in state assessments. Students completing a Special Diploma option typically participate in the Virginia Alternate Assessment Program (VAAP) through the course of their 11th grade year. The Virginia Alternate Assessment Program (VAAP) is designed to evaluate the performance of students who are unable to be successful in the general education curriculum. The VAAP is available to students in grade 11 who are working on academic standards that are not as complex. This content is derived from the Standards of Learning (SOL) and is referred to as the Aligned Standards of Learning (ASOLs). Individual student achievement of academic skills is the single focus of the VAAP.

Certificate of Program Completion

The certificate of program completion is awarded to those general education students who meet all state requirements for graduation except passing the Standards of Learning test. It is available to students who complete programs of studies defined by a local school board but who do not qualify for diplomas.

Virginia Graduation Requirements

Virginia Graduation Requirements

The requirements for a student to earn a diploma from a Virginia high school shall be those in effect when that student enters the ninth grade for the first time. Students may be awarded a diploma or certificate upon graduation from a Virginia high school.

Modified Standard Diploma (For students entering the 9th grade beginning before the 2013-2014 school year)

For Grades 9 – 10 – 11- 12

The Modified Standard Diploma program is intended for students at the secondary level who have special needs and are unlikely to meet the credit requirements for a Standard Diploma. Eligibility and participation in the Modified Standard Diploma program shall be determined by the student's Individual Education Program (IEP) team at any point after the student's eighth grade year.

The school must obtain the informed written consent of the parent/guardian and the student to choose this diploma program after review of the student's academic history and the full discussion of the student's options.

The student who has chosen to pursue a Modified Standard Diploma shall also be allowed to pursue the Standard or Advanced Studies Diploma at any time throughout that student's high school career. The student must not be excluded from courses and tests required to earn a Standard or Advanced Studies Diploma

Modified Standard Diploma - 20 Credits

<u>Subject</u>	<u>Required Units</u>	<u>Grades</u>
<u>9 - 12</u>		
English	4	
Mathematics (shall include content from Algebra, Geometry, Personal Finance, and Statistics).....	3	
Science (must include at least two of the following: Earth Science, Biology, Environmental Science, Chemistry, or Physics).....	2	
History and Social Science (U.S. and Virginia History, U.S. and Virginia Government)	2	
Health & Physical Education.....	2	
Fine Arts or Practical Arts	1	
Electives (two of these must be matching electives).....	6	
Total Credits	20	

Note: Two year sequence courses earn a full credit for each year.

State Assessment Required

Students pursuing the Modified Standard Diploma must pass the eighth grade S.O.L. in English (Reading Literature and Research only) and Mathematics. A score of 344 in Mathematics and a score of 371 in English is required for passing. **All students in any course with an SOL end-of-course exam must take that exam.** Test accommodations for students with special needs are available and should be determined by the student’s IEP Team.

Standard Diploma

For Students whose 9th grade year occurred prior to the 2010-2011 school year

To graduate with a Standard Diploma, students must earn at least 22 standard units of credit by passing required courses and electives, and earn at least six verified credits by passing end-of-course SOL tests or other assessments approved by the Board of Education. The table below displays the minimum requirements for a Standard Diploma.

Standard Diploma - 22 Credits

*Beginning with students entering ninth grade for the first time in **2013-2014**, a student must also:*

- Earn a board-approved career and technical education credential to graduate with a Standard Diploma; and
- Successfully complete one virtual course, which may be non-credit bearing.

¹Students who complete a career and technical education program sequence and pass an examination or occupational competency assessment in a career and technical education field that confers certification or an occupational competency credential from a recognized industry, or trade or professional association, or acquires a professional license in a career and technical education field from the Commonwealth of Virginia may substitute the

certification, competency credential, or license for (i) the student-selected verified credit and (ii) either a science or history and social science verified credit when the certification, license, or credential confers more than one verified credit. The examination or occupational competency assessment must be approved by the Board of Education as an additional test to verify student achievement.

²Credits earned for this requirement shall include one credit in fine or performing arts or career and technical education.

³A student may utilize additional tests for earning verified credit in computer science, technology, career and technical education, economics or other areas as prescribed by the Local Education Agency’s school board.

Advanced Studies Diploma

To graduate with an Advanced Studies Diploma, students must earn at least 24 standard units of credit by passing required courses and electives, and earn at least nine verified credits by passing end-of-course SOL tests or other assessments approved by the Board of Education. The table below displays the minimum requirements for a Standard Diploma.

Advanced Studies Diploma - 24 Credits

Effective with first-time ninth graders in 2003-2004 through 2010-2011

**Virginia's Standard of Learning
State Assessment Requirements**

English (two verified units of credit):

- a. The two verified units of credit may be earned by passing the high school Standards of Learning (SOL) tests in English/Reading and English/Writing. As with all high school SOL tests, these may be retaken if the student does not pass initially.

An acceptable score on approved substitute tests also may earn verified units of credit in English (i.e. ACT, WorkKeys: Writing, SAT II English, Advanced Placement (AP) English tests, or Test of English as a Foreign Language (TOEFL)).

Mathematics, Science, and History/Social Science (3 verified units of credit):

- b. **MATHEMATICS:** A verified unit of credit may be earned by passing ANY **one** of three high school SOL mathematics tests (Algebra I, Algebra II, or Geometry).

SCIENCE: A verified unit of credit may be earned by passing ANY **one** of the three high school SOL science tests (Earth Science, Biology, or Chemistry).

HISTORY/SOCIAL SCIENCE: A verified unit of credit may be earned by passing ANY **one** of the four high school history/social science SOL tests (U.S. History, World History I, World History II, or World Geography).

These verified units of credit also may be earned by an acceptable score on any of the approved substitute tests, including ACT, Advanced Placement (AP), College-Level Examination Program (CLEP), or SAT II.

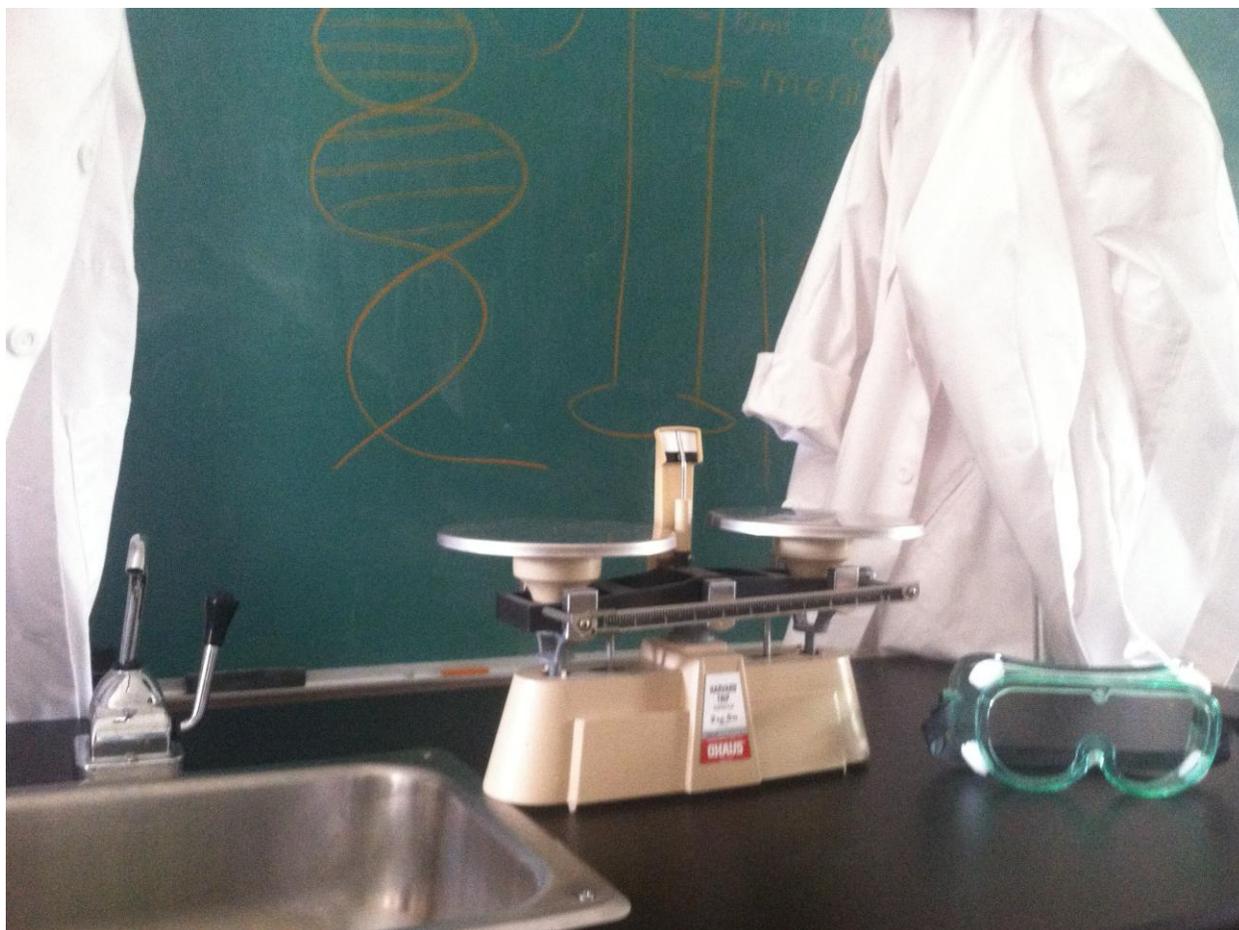

Student's Choice (1 verified unit of credit)

- c. This verified unit of credit may be earned by passing any SOL test that is not already satisfying a required verified unit of credit or by passing tests in computer science, technology, or other areas as described by the Board.

Additionally, the Department of Education has approved a large number of state licensing exams in career/technical fields, as well as national industry certification exams, which counts toward verified units of credit.

The two verified units of credit may be earned by passing the high school Standards of Learning (SOL) tests in English/Reading and English/Writing. As with all high school SOL tests, these may be retaken if the student does not pass initially.

An acceptable score on approved substitute tests also may earn verified units of credit in English (i.e. ACT, WorkKeys: Writing, SAT II English, Advanced Placement (AP) English tests, or Test of English as a Foreign Language (TOEFL)).

Service Learning ¹	75 hours

**Application of knowledge, tools, and skills to solve practical problems and extend human capabilities

Competency Requirements

¹ Service Learning

In order to meet Maryland's graduation requirements students must participate in seventy-five hours of student service that includes preparation, action, and reflection components. Because all 24 school districts in Maryland have unique academic and community needs, they all chose to design their programs locally (option 2). Therefore, there are 24 different implementation models around the state. This activity is documented during the students four years in high school. (See verification work sheet on page 69).

Because all 24 school districts in Maryland have unique academic and community needs, they all chose to design their programs locally (option 2). Therefore, there are 24 different implementation models around the state. Some districts require students to conduct individual service-learning projects in the community. Most school districts infuse service-learning activities into the existing curriculum to help students use their academic skills to solve real community problems. Districts are encouraged to review and revise their plans, based on lessons learned during implementation.

**Maryland's State
Assessment Requirements prior to 2013-2014 school year**

HIGH SCHOOL ASSESSMENTS			
Subject Area	Current Specific Credit Requirements	Phase I	Future Phases
English	4 Credits	English I	3 end-of-course exams: - English I - English II - English III
Mathematics	3 credits - 1 credit in fundamental or advanced algebraic concepts and topics - 1 credit in fundamental or advanced geometric concepts and topics	Algebra and Geometry	2 end-of-course exams covering: - Algebra/data analysis and probability - Geometry
Science	3 credits, including laboratory experience in any or all the following areas: - Earth Science - Life Science - Physical Science	Biology	An end-of-course exam in two of the following areas: - Earth/space science - Biology - Chemistry - Physics
Social Studies	3 credits - 1 credit in U. S. History - 1 credit in World History - 1 credit in Local, State, and National Government	Government	3 end-of-course exams in: - U.S. history - World history - Government

Students who entered grade 9 in the fall of 2005 and later (COMAR 13A.03.02.09) must obtain either a passing score on all four HSAs or obtain an overall combined score of 1602. Students are required to **take and pass** the HSA.

The HSA passing scores are:

- Biology 400;
- Algebra/Data Analysis 412;
- English 396; and
- Government 394.

Maryland High School Certificate

Special Education students who are not able to earn a diploma, based on the decision of the IEP Committee, may pursue a High School Certificate. The IEP Committee decides when a student has met the standards necessary to earn a Maryland High School Certificate and is ready to exit the school system.

State Assessment Required

The Alternative Maryland School Assessment (ALT-MSA)

The ALT-MSA is the alternate accountability assessment to the Maryland School Assessment (MSA). This is for the small group of students who can not participate in the MSA even with accommodations and is determined by the individual student's IEP team. Students with IEP's can participate in the ALT-MSA if they participate in the Fundamental Life Skills curriculum that includes instruction in functional academics, personal management, and community recreation/leisure, career/vocational, and communication/decision making/interpersonal skills. Students participate in the ALT-MSA in grade 10.

West Virginia Diplomas

Standard Diploma

This requires formal documentation and recognition that students have satisfactorily completed the requirements of the state and county school district.

An individualized education program shall specify how graduation credits are to be earned by students with disabilities.

A special education Individualized Education Program committee determines that the approved learning objectives are reasonable for a particular student. Changes may be made to the delivery of learning objectives are considered necessary by the IEP Committee and are specified in the IEP. A student who masters the individualized education program learning objectives shall be awarded a standard diploma.

In planning their programs, students may omit two of the elective units indicated above; however, it should be pointed out that the school requires a full day’s attendance for all students, except those who are working on a job as part of the program and for which credit is awarded.

Modified Diploma

This is awarded to a student (who has severe disabilities) satisfactorily completes modified graduation requirements. Students with severe disabilities are defined as those students with impairments so severe that instructional objectives are not appropriate, even when delivered through different strategies (i.e. changes in delivery, teaching strategies, and evaluation techniques). The Individualized Education Program (IEP) Committee determines if the student is unable to meet the graduation requirements for a standard diploma.

The West Virginia Alternate Performance Task Assessment (APTA)

The APTA is an alternate to the West Virginia Education Standards Test 2 (WESTTEST 2). This is for students who cannot participate in the WESTTEST 2 even with accommodations and is determined by the individual student's IEP team. APTA assesses questions in three content areas: Reading/Language Arts, Mathematics, and Science. A separate test was developed for each grade level in Reading/Language Arts and Mathematics (grades 3-8 and 11) and in Science (grades 4, 6, and 10). The reading/language arts content area of the test addresses the three content standards of (1) reading, (2) writing, and (3) media literacy. The mathematics content area of the test addresses the five content standards of (1) number and operations, (2) algebra, (3) geometry, (4) measurement, and (5) data analysis and probability. The science content area of the test addresses the two content standards of (1) nature and application of science and (2) content of science.

Community Service 100 hours

Community Service

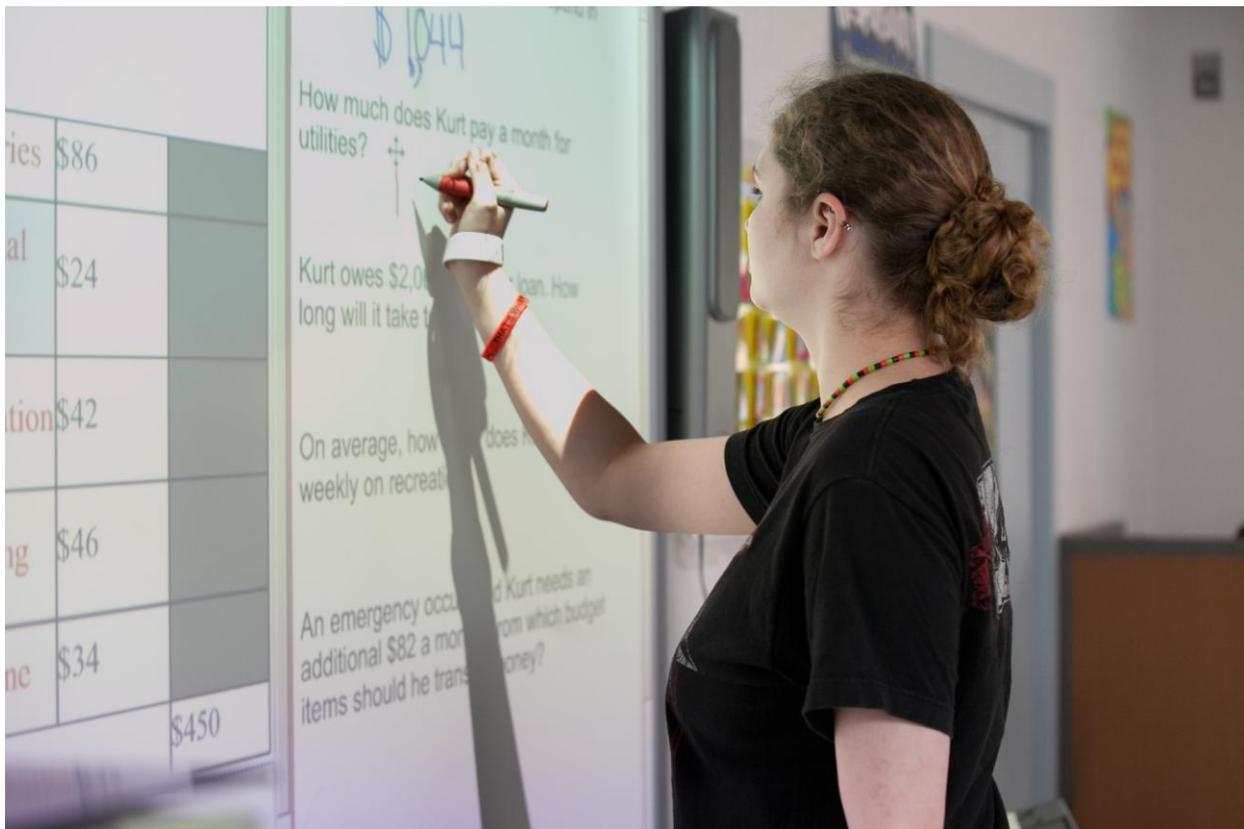

Students in the District of Columbia Public Schools must complete 100 hours of community service as a graduation requirement. The goals of the community service program are to increase students’ self-worth, provide experiences for students to contribute to society, and prepare students for the world of work. Service-Learning places emphasis on quality services, links academics to real life applications, and connects the classroom learning experience to career options through service.

Documented and verifiable hours should be placed in the student’s cumulative record along with grade reports each year. Fifty hours should be completed during the 11th and 12th grades; however, community service can begin in 9th grade.

Description of Courses for a Standard and Modified/Standard Diploma

High School Standard Credit Track- Berryville

Description of Courses

These courses are a sample of those that may be offered at any site:

Business Technology Education

BTECH I- Keyboarding

1 Credit

Grades: 9, 10, 11, &12

Prerequisite: None

In this course, students will become familiar with the keyboard, use appropriate finger control on the keyboard, and learn alphanumeric keyboarding techniques. It is designed to teach keyboarding by touch (without looking at the keys or your fingers) to speeds of 30-35+ wpm and no more than 2 errors per minute. The alphabetic and punctuation keys, keyboard numbers and symbols are covered. Every lesson contains timed exercises and students are encouraged to meet the speed and accuracy goals in each exercise before continuing on to the next one. Goal-directed practice on each exercise helps students progress much further and faster. Individualized education and pacing will be emphasized.

BTECH II- Word Processing Applications

1

Credit

Grades: 9, 10, 11, &12

Prerequisite: BTECH I or approval of Instructor

In this course, students will receive hands-on instruction using Microsoft Office suite software. This course will prepare students for the “Core” level of Microsoft Office Specialist certification. The areas covered include Word, Excel, PowerPoint, and Access. Instruction is provided in a visual step-by-step guide for each application. Students will learn skills to prepare documents that include formatting, editing, spreadsheets, graphing, multi-media presentations and database use as required by the work force. Individualized education and pacing will be emphasized.

BTECH III- Advanced Office Technology

1

Credit

Grades: 10, 11, & 12

Prerequisites: BTECH II or approval of Instructor

In this course, students will receive hands-on instruction using simulated software situations to prepare students for the “Expert” level of Microsoft Office Specialist certification. The students will develop office technology skills through desktop publishing, telecommunications, spreadsheets, data entry applications, presentations, and advanced word processing. Instruction is provided in a visual step-by-step guide for each application. Students will begin to use the skills for real life simulations. Individualized instruction will be emphasized.

English

Students must earn four credits in English for the Standard diploma. Each year of English builds on the student’s previous instruction in reading, writing, speaking, and listening. English classes are both sequential and developmental.

Near the end of English 11, Virginia students must take the two Standards of Learning tests: (1) Reading, Literature, and Research and (2) Writing.

Students in all English classes receive instruction to prepare them for the tests.

The chart below may help individuals decide the most appropriate classes.

Level	Designed for the Student Who...
General	<ul style="list-style-type: none"> • Writes competently • Composes with infrequent errors in usage and mechanics which interfere with clear communication • Reads with understanding • Discusses literature with understanding • Profits from instruction to improve clarity in oral and written communication • Corrects errors in mechanics and usage after instruction
Modified	<ul style="list-style-type: none"> • Needs individual attention and encouragement in speaking, reading, and writing • May have special learning needs • Benefits from intense instruction in reading and writing • May need assistance in passing SOL and/or Literacy Passport Tests
Content	
General	<ul style="list-style-type: none"> • American, English, and World literature • Life skills in reading and writing • Practical reading and writing applications • Concentrated instruction in usage and mechanics • Learning through reading for pleasure • Individual and collaborative learning
Modified	<ul style="list-style-type: none"> • Specific and extended practice and instruction in reading and writing skills • Reading for pleasure and the workplace • American, English, and World literature • Writing for life and the workplace • Practice in the writing process • Individual and collaborative learning

English (continued)

***English 9 - General**

1 Credit

Grade 9

Prerequisite: None

This course is designed for students reading at or near grade level. The course of studies includes literature, composition and grammar. Improvement in specific composing skills is encouraged through the writing of paragraphs, informal essays, poetry, and book reports. The student's study of spelling, parts of speech, sentence structure, usage and punctuation is directed toward increasing accuracy in writing and speaking. Myths, legends, short stories, drama and poetry make up the literature portion. *(This is a Standards of Learning aligned course that is tested in 11th grade).*

++English 9 - Modified

1 Credit

Grade 9

Prerequisite: None

This course is designed to provide concentrated instruction in reading comprehension and vocabulary to students with deficiencies in these areas. Spelling, grammar, paragraph writing and literature are also incorporated into this class. This course stresses improved reading and written communication skills and a self paced process for each student. Myths, legends, short stories, drama and poetry make up the literature portion. *(This is a Standards of Learning aligned course that is tested in 11th grade).*

***English 10 - General**

1 Credit

Grade 10

Prerequisite: English 9 - General or Modified

This course is designed for students reading at or near grade level. The course is devoted to improving the student's abilities in grammar and usage, spelling, vocabulary and the writing process. Literary studies will include: the short story, a novel, drama, prose forms and poetry. Writing experiences include: book reports, practical documents and paragraphs. Library skills are used for a short written research project. *(This is a Standards of Learning aligned course which is tested in 11th grade).*

++English 10 - Modified

1 Credit

Grade 10

Prerequisite: English 9 - Modified

This course is designed to provide concentrated instruction in reading comprehension and vocabulary to students based on individualized skill

assessments. Spelling, grammar, paragraph writing and literature are also incorporated into this class, writing experiences include: practical documents and short essay. This course stresses improved reading and written communication skills with work and a self-paced process used for each student. *(This is a Standards of Learning aligned course that is tested in 11th grade).*

*Required Course – Standard Diploma

++Required Course – Virginia Modified Diploma when applicable

***English 11 - General** S.O.L. TEST **1**
Credit

Grade 11

Prerequisite: English 10 - General or Modified

This course is designed to teach students an appreciation and understanding of the major forms of literature, how to write a literary/research paper requiring research skills, vocabulary enrichment, reading skills, composing skills using the writing process, study skills, career skills and oral skills. American Literature is presented through a survey of the major literary periods, genres and authors. *(This course has an end of course Standards of Learning cumulative tests 9-11th grade).*

++English 11 - Modified S.O.L. TEST **1 Credit**

Grade 11

Prerequisite: English 10 - Modified

Instruction in reading, writing and speaking are adjusted for student progress, review and remediation. Writing experiences include: book reports, paragraphs, essays, practical documents and letters. Students will study American Literature. Instruction in grammar focuses on the achievement of correct usage in the student's speaking and writing. Students are introduced to basic documentation of sources as they prepare a written research report. *(This course has an end of course Standards of Learning cumulative tests 9-11th grade).*

***English 12 - General** **1 Credit**

Grade 12

Prerequisite: English 11 - General

This course will emphasize the study of English Literature through a survey of the major literary periods, genres and authors, as well as writing both analytically and creatively. In addition, the course includes a review of

research techniques and the writing of a formal literary/research paper related to the study of English Literature. Book reports and the study of a novel will also be required.

++English 12 - Modified

1 Credit

Grade 12

Prerequisite: English 11 - Modified

This course will emphasize the study of literature and writing at a pace appropriate to the student's ability. The process of writing will be a focus, as will reading skills, study skills, vocabulary development, speaking skills and career skills. The students will prepare a literary /research paper requiring research skill; book reports will be required.

*Required Course – Standard Diploma

++Required Course – Virginia Modified Diploma when applicable

Applied Communications 1 – 4 Modified

Grades 9, 10, 11 & 12

Can be taken for one semester or two

.5 credit per semester

(may take 2 semesters per year)

The course is designed for students who have demonstrated a deficiency in reading and/or writing. It is recommended for students taking the 8th grade English S.O.L. (Reading, Literature and Research) test or the English 11 S.O.L. verified test. This course is individualized to the students needs based on the content of the State assessment that the student will be taking. Students will increase word segmentation skills, fluency and inferential comprehension skills as they read selections in a variety of genre. Students will increase knowledge of composition by demonstrating the ability to express themselves, in writing, and to express sequencing, revising and editing in the writing process will be increased. There will also be a focus on enlarging vocabulary through the study of words, taking notes from written, oral and audio-visual materials and the publishing of finished composition works.

Basic Study and Test Skills

Grades 9 through 12

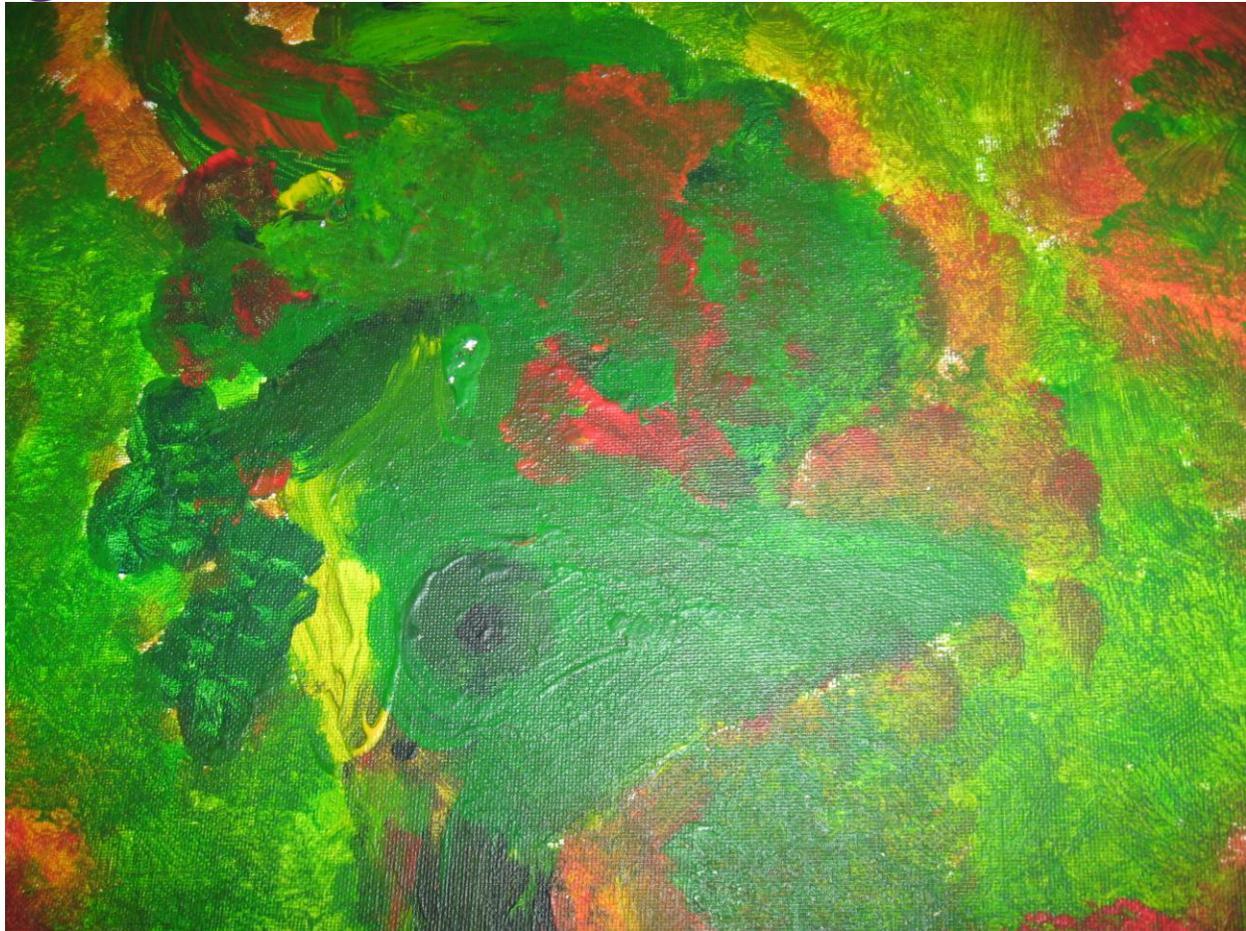

Prerequisite: None

.5 credit per semester

This course focuses students on a variety of strategies and techniques to enable increased achievement in school. These techniques include independent study skills which are practiced with materials from one or more content areas (i.e. math, science, etc.). Additional focus is provided concerning standardized test taking strategies and remediation (based upon student's previous performance on state and local assessments). Concepts of the course may also include effective time management, note taking, self advocacy, and task prioritization as needed.

*Required Course – Standard Diploma

++Required Course – Virginia Modified Diploma when applicable

Student Artwork

Fine Arts

Art 1

1 Credit

Grades 9, 10, 11 & 12

Prerequisite: None

A wide variety of experiences enhance the basic foundation of art-related knowledge, skills, and ideas developed in middle school. Students explore ideas, materials, and techniques through creative and critical problem solving. Students engage in the process of art criticism and aesthetic critiques. Class discussion includes both critiques of their own pieces and the work of other artists. The course incorporates art history, art criticism, aesthetics, and art production to include experiences with drawing, painting, sculpture, printmaking, ceramics, photography, and computer graphics. The instructor encourages students to make connections between the visual arts and other subject areas.

Art 2**1 Credit**

Grades 10, 11 & 12

Prerequisite: Art 1

Students work with more advanced techniques, media, concepts, and ideas. Focus is on the connection between studio production and personal expression. Students begin to develop and refine personal technique and style through the study of art history, art criticism, and aesthetics in relation to studio production. Units of study allow for more in-depth study of various media and the creative process. Units provide a balance of two- and three dimensional experiences.

Art 3**1 Credit**

Grades 11& 12

Prerequisite: Art 1, Art 2

Students enhance and refine their personal techniques and styles through the further study of art history, art criticism, and aesthetics in relation to studio production. They begin to take the initiative for generating and designing studio assignments using advanced techniques, media, and concepts. Through the synthesis of art production, art history, art criticism, and aesthetics, students focus on the relevance of art throughout history and in their own lives. Students develop their portfolios for use in demonstrating their progress and as an effective college entrance asset.

Music Appreciation:**1 Credit**

Grades 9, 10, 11 & 12

Prerequisite: None

This course is specifically designed to aid student in discovering and exploring the various ways that we, as humans, use music in our lives. Different areas covered in this course include music as an expression of who we are, music to let us create, music to understand life's meaning, and music to characterize the age. Integrated into each area are musical concepts (SOL based) including theory, history, appreciation, and performance through singing, moving, and playing, and the relationship between music and other disciplines. Students taking this class are encouraged to experience music first hand, both within the group and individually. Each student will gain a deeper understanding of how music can be used and enjoyed in everyday life as well as develop skills in using music for relaxation, leisure, anger management, exercise, and spontaneous expression.

Music Instrumental Methods:**1****Credit**

Grades 9, 10, 11, & 12

Prerequisite: Teacher Recommendation/Audition

This course offers a supportive learning environment in which students will develop fundamental playing skills on musical instruments. Techniques such as proper playing position, tone production, reading music, fingerings, and playing independently and in an ensemble are the main emphasis of this course. Although playing and performance will be the main methods of learning these skills, the process towards and not the product of the performance is emphasized most. Other skills utilized within this course are individual responsibility, care of instruments, and appropriate concert etiquette for performers, accompanists, and audiences.

Music Theory/History:**1 Credit**

Grades 9, 10, 11, & 12

Prerequisite: Music Appreciation

This course builds on the music theory and history concepts that are presented in Music Appreciation by providing the student with further hands on experience in composing and analyzing written music. Students will also further develop their critical thinking skills with regards to the music that surrounds us, and will increase their vocabulary in order to express these thoughts knowledgeably. This course is recommended for students who wish to pursue music in college and/or as a career, and also for those students who love music and the creation thereof.

Health and Physical Education***Health & Adaptive Physical Education 9****1****Credit**

Grade 9

Prerequisite: None

This course is designed for students who have a disability that limits their potential for success in certain physical activities. It is designed to contribute to the fullest development of the student's physical activities. Students will have an individual program of physical activities adapted to match their capabilities, needs and interests. The health course will cover the facts and concepts consistent with the material taught in the general class, but the pace and depth of the material may be reduced and modified to meet the individual's needs.

***Health and Physical Education 9**

1 Credit

Grade 9

Prerequisite: None

This is a required course in which the instruction is divided equally between health education and physical activities. The health course is one with emphasis on First Aid, CPR, Mental Health and Family Life Education. In physical education, both team and individual sports are taught. The major emphasis is on fitness for life.

***Health & Adaptive Physical Education 10**

1

Credit

Grade 10

Prerequisite: Health and Adaptive Physical Education 9

This course is designed for students who have a disability that limits their potential for success in certain physical activities. It is designed to contribute to the fullest development of the student's physical activities. Students will have an individual program of physical activities adapted to match their capabilities, needs and interests. The health course will cover the facts and concepts consistent with the material taught in the general class, but the pace and depth of the material may be reduced and modified to meet the individual's needs.

***Health and Physical Education 10**

1

Credit

Grade 10

Prerequisite: Health and Physical Education 9

This is a required course in which the instruction is divided equally between health education and physical activities. The health course is one with emphasis on Drug Education, Nutrition Education and Family Life Education. In physical education, both team and individual sports are taught. The major emphasis is on fitness for life.

Wellness, Health and Physical Education

1

Credit

Grades 11 & 12

Prerequisite: Health and Physical Education 9 & 10

Students continue to learn and practice lifetime leisure activities and sports with emphasis on fitness as it relates to total wellness.

*Required Course – Take either General or Adaptive

Home Economics

Family Living

1/2 Credit

Grades 9, 10, 11 & 12

Prerequisite: None

This semester course is designed to give students a better understanding of contemporary issues that influence their choice of a lifestyle. Included are: roles and responsibilities of individuals in relationships, teen decision making, AIDS awareness and adjustments as they pertain to marriage and/or parenthood.

Family and Consumer Science **Credit**

1/2

Grades: 9, 10, 11 & 12

Prerequisite: None

This is a semester course that is designed to include several areas of Family and Consumer Science. Students will study and experience practical application of nutrition, food science, preparation of and buying of foods throughout the life cycle. Basic sewing skills will be performed though the construction of projects with the use of sewing machines, fabrics and patterns. Other areas of study will include wellness, weight management, etiquette, and clothing care. This class includes a balance of class work, demonstrations and hands-on experience.

Mathematics

General Mathematics 9

1 Credit

Grade 9

Prerequisite: None

Note: This course will count as an elective math credit for the Virginia Modified Standard Diploma when applicable.

This course is designed for students of low mathematical ability. Improvement in the basic skills of addition, subtraction, multiplication and division with whole numbers, fractional numbers and decimal numbers is emphasized. Topics include reading schedules, maintaining checking accounts, net and

gross earnings, shopping, taxes, etc. This course is relevant to students who expect to join the work force after completing high school.

Math Applications

1 Credit

Grade 9, 10, 11, 12

Prerequisite: None

Note: This course will count as an elective math credit for the standard diploma and will count as a required credit under the Virginia Modified Standard Diploma when applicable.

A firm foundation in the basic arithmetic skills including fractions and decimals will be presented. Practical applications of general mathematics are used throughout the course. An introduction to the use of algebra, geometry, and statistics as applied to problem solving, ratios and percents will be included.

Economics and Personal Finance
Credit

1

Grades 9, 10, 11 & 12

None

Note: This course will count as an elective math credit for the standard diploma and will count as a required credit under the Virginia Modified Standard Diploma when applicable.

Economics and Personal Finance is a course which applies basic computational skills in solving everyday problems that students would encounter as a consumer. The course will help students make sure their decisions are wise ones. Units on money management, banking, consumer credit, taxes, food, clothing, transportation, housing and insurance will be emphasized.

Intermediate Math Skills

1 Credit

Grade 11, 12

Note: This course will count as an elective math credit for the Virginia Modified Standard Diploma when applicable.

This course is designed for students needing assistance to prepare for the 8th grade SOL Mathematics test. The emphasis of instruction will be based on the individual's needs in the Basic Math Skills (numeration, basic operations and

problem solving) and Functional Math Skills (managing finances, measurement and consumerism).

Intro to Elementary Algebra Parts I & II

1 Credit

Grades 9, 10, 11 & 12

Prerequisite: None MD students - Core Requirement; VA students – Standard Diploma – Counts as a Math Elective; *Modified Standard Diploma counts as a Math Elective when applicable.*

The basic skills and concepts of pre-algebra will be integrated with concepts of algebra. Students will begin a study of the real number system. Importance in Introduction to Elementary, Algebra Parts I & II is on proficiency in computation with numbers in these various systems. This course is designed for students who need additional preparation for Algebra I and a basic overview of algebraic functions for a vocational program.

***Algebra I, Part I & II** S.O.L. TEST

1 Credit

Grades 9, 10, 11 & 12

Prerequisite: None

Note: This could be a two-year sequence for the Virginia Modified Standard Diploma for which it a required course when applicable.

The content of this course is oriented toward an understanding of the properties of the real number system. Careful study is given to the solving of equations and inequalities, polynomial expressions, graphs and to the development of the skills needed in the courses, which follow. This is the entry level course of the Academic Mathematics sequence.

***Geometry** - General S.O.L. TEST

1

Credit

Grades 10 & 11

Prerequisite: Algebra I

This course includes the axioms and theorems of Euclidean Plane Geometry and emphasizes deductive proofs. Coordinate Geometry and Elementary Trigonometry of the triangle are included, along with a unit on compass and straightedge construction.

Geometry, Part I & II - Modified S.O.L. TEST

1

Credit

Grades 10, 11 & 12

Prerequisite: Algebra I A&B or Intro. to Elementary Algebra I Parts I & II
Note: This could be a two year sequence for the Virginia Modified Standard Diploma when applicable.

This course is the study of plane geometry. Most of the theorems are postulated and emphasis is placed on learning to use geometric formulas and concepts and studying simplified proofs. Much of the course will provide hands-on experience using compass and straightedge construction, as well as provide deductive reasoning activities which include critical thinking, exploration and everyday living applications.

***Algebra II Part I & II, A & B** S.O.L. TEST

1 Credit

Grades 10, 11 & 12

Prerequisite: Geometry and Algebra I

Content includes functions, relations, linear equations, inequalities, and their graphs. The irrational numbers lead to the development of the quadratic formula. Quadratic systems, complex numbers, and logarithmic and exponential functions are also studied.

*Two of these three courses are required for Standard Diploma

PreCalculus

1 Credit

Grades 10, 11 & 12

Prerequisite: Algebra II

Emphasizes polynomial, exponential, logarithmic, and rational functions, theory of equations, sequences and series, conic sections, limits, mathematical induction, and the Binomial Theorem. Trigonometry topics include triangular and circular definitions of the trigonometric functions, establishing identities, special angle formulas, Law of Sines, Law of Cosines, and solutions of trigonometric equations. Constructing, interpreting, and using graphs of the various function families are stressed throughout the course of study.

Calculus

1 Credit

Grades 11 & 12

Prerequisite: PreCalculus

Explores the topics of limits/continuity, derivatives, and integrals. These ideas are examined using a multi-layered approach including the verbal, numerical,

analytical, and graphical analysis of polynomial, rational, trigonometry, exponential, and logarithmic functions and their inverses. The student is expected to relate the connections among these approaches. Students are also required to synthesize knowledge of the topics of the course to solve

applications that model physical, social, and/or economic situations. These applications emphasize derivatives as rates of change, local linear approximations, optimizations, and curve analysis, and integrals as Riemann sums, area of regions, volume of solids with known cross sections, average value of functions, and rectilinear motions.

Science

***Earth Science - General** S.O.L. TEST **1 Credit**

Grade 9

Prerequisite: None

The content of this course includes general information in meteorology (weather), oceanography, geology (rocks, minerals and earth processes) and astronomy. Earth Science provides a practical and theoretical background for all of the specialized sciences and gives insight into a variety of exciting science careers. Emphasis will be placed on practical knowledge in Earth Science and man's relationship to and dependence upon earth processes.

++Earth Science, Part I & II – Modified S.O.L. TEST **1 Credit**

Grade 9

Prerequisite: None

This could be a two year sequence for the Virginia Modified Standard Diploma when applicable.

This course is designed to use a variety of teaching methods such as demonstrations, laboratory activities, oral reading of the text along with discussions and related films and filmstrips. The students are provided with the facts and concepts that are covered in the general class, but the pace and depth of the material are reduced. Emphasis will be placed on practical knowledge of Earth Science.

***Biology - General** S.O.L. TEST **1 Credit**

Grades 10, 11 & 12

Prerequisite: Earth Science

Biology is the study of life, including both the structure and functions of organisms and the role of those organisms in the environment. Students extend their logical thinking and problem solving skills by investigating the living world. In Biology I – General, emphasis will be placed on practical knowledge in biological science, including life processes, interrelationships and dependence among species. Laboratory periods serve to give practical applications of some of the basic concepts formed throughout the course.

++Biology, Part I & II - Modified **S.O.L. TEST** **1 Credit**

Grades 10, 11 & 12

Prerequisite: None

This could be a two year sequence for the Virginia Modified Standard Diploma when applicable.

Basic Biology is designed for students needing curriculum adaptations. Organization of notes and other materials is part of the student’s evaluation. The course content is designed to provide the necessary biology needed to understand living conditions and phenomena. The course investigates consumer biology, human health requirements and provides students with basic biology concepts. Laboratory experiences are designed to be related to the fundamental life processes students will experience.

*Required Course – Standard Diploma

++Required Course – Virginia Modified Diploma

Physical Science **1 Credit**

Grades 11 & 12

Prerequisite: Earth Science and Biology

This course counts as a Science elective for the Virginia standard diploma and as the third required Science for students from Maryland and the District of Columbia.

The content of Physical Science is a conglomerate of information based on Life Science, Earth Science, Biology, Physics and Chemistry. The main emphasis is placed on energy and how it affects mankind through weather, ecosystems, the Earth’s resources, shelter and flight/aviation. The course content is designed to extend basic information of other courses and apply technical knowledge to further the student’s understanding of technology in today’s world. This course will provide fundamental information with vocabulary emphasis and provide a hands-on, inquiry-based approach to learning.

Environmental Science**1****Credit**

Grade 11 & 12

Prerequisite: Earth Science and Biology

This course enables students to develop a clearer understanding of the natural environment and the current environmental issues that the world faces. This course is designed to include laboratory and field experiences to study environmental awareness including: fundamental ecological principles, human population dynamics, natural resources, and energy sources and their use. Utilizing group discussion, current media outlets, and current scientific research, students will analyze human/environmental interactions which include personal, civic, and ethical responsibilities.

Chemistry**1 Credit**

Grade 11 & 12

Prerequisite: Algebra I

Students investigate the structure, properties, and reactions of matter. Classroom study is balanced with laboratory experiences to deepen the students' understanding of Chemistry. Analytical experimental investigations are conducted using the scientific method, and proper safety precautions are employed. Students investigate kinetic theory, the Periodic Table stoichiometry, redox equations, and the chemical equilibrium. Students report findings of both qualitative and quantitative data using effective communication skills, correct expression of significant figures and error, and factor labeling in problem solving.

Physics**1 Credit**

Grade 11 & 12

Prerequisite: Algebra II

This course uses a highly mathematical approach. Students learn and use many algebraic and trigonometric concepts while investigating physics content. Laboratory work includes graphical analysis. Topics include mechanics, heat, electricity and magnetism, waves and optics, the Special Theory of Relativity, and atomic structure.

*Required Course – Standard Diploma

++Required Course – Virginia Modified Diploma when applicable.

High School Standard Track- Winchester

History and Social Science/Virginia

***World History and Geography I - General**

S.O.L. TEST

1 Credit

Grade 9

Prerequisite: None

World History and Geography I is an in-depth course which contains a more rigorous work requirement designed to challenge. Students will explore the development of people, places, and patterns of life from ancient times through the Renaissance/Reformation. A major research project is required.

++World History and Geography I - Modified

S.O.L. TEST

1 Credit

Grade 9 and 10

Prerequisite: None

This could be a two-year sequence for the Virginia Modified Standard Diploma when applicable.

This course enables students to explore the historical development of people, places, and patterns of life from the ancient times through the Renaissance/Reformation. Students study the origins of much of our heritage using texts, maps, pictures, stories, diagrams, charts, chronological skills, inquiry/research skills, and technology skills. Spatial concepts of geography will be linked to chronological concepts of history.

World History and Geography II - General

S.O.L. TEST

1 Credit

Grade 10

Prerequisite: World History and Geography I

This course continues the in-depth study of history and geography from the end of the Renaissance/Reformation to the present with emphasis on Western Europe. The course is designed to challenge more advanced students as they study broad themes of history and probe specific historic events, ideas, issues, persons, and documents. . Using texts, maps, pictures, stories, diagrams, charts, and a variety of chronological, inquiry/research, and technological skills, students develop competence in chronological thinking, historical comprehension, and historical analysis. A major in-depth research project is required.

++World History and Geography II - Modified

S.O.L. TEST

1 Credit

Grade 10

Prerequisite: World History and Geography I

This course covers history and geography from the end of the Renaissance/Reformation to the present with an emphasis on Western Europe. Geographic influences on history continue to be explored, but increasing attention is given to the political boundaries that developed with the evolution of nation-states. Using texts, maps, pictures, stories, diagrams, charts, and a variety of chronological, inquiry/research, and technological skills, students develop competence in chronological thinking, historical comprehension, and historical analysis.

***United States and Virginia History - General**

S.O.L. TEST

1

Credit

Grade 11

Prerequisite: None

The purpose of this course is to prepare students for advanced level work. Emphasis is placed on the development of research and writing through the study of major events and personalities of American history from the colonial period to the modern era. Additional emphasis is placed on Virginia's role in the development of America.

++United States and Virginia History Part I & II - Modified S.O.L. TEST
1 Credit

Grade 11

Prerequisite: None

This is a two-year sequence for the Modified Standard Diploma when applicable and the S.O.L. test must be taken if the student elects to take Part II of this course.

This course deals with the development of American ideals and institutions through the study of major events and personalities of American history from the colonial period to the modern era. The course provides a perspective on the relationship between the past and contemporary issues, with emphasis on the United States as a world leader. The role which Virginia played in the development of America is emphasized.

***United States and Virginia Government - General** **1**
Credit

Grades 12

Prerequisite: None

The course content consists of the following units: foundations of the American Constitution, structures and powers of the three branches of government, civil rights, government regulation of the economy and the welfare state, political parties and voting behavior, defense and foreign policies, as well as state and local governments. Democratic values and citizen participation in government are emphasized to help prepare the students to become responsible voters.

++United States and Virginia Government - Modified
1 Credit

Grades 12

Prerequisite: None

This course is designed for students who lack developed reading skills. Through the use of a carefully controlled vocabulary and appropriate texts, as well as relevant supplementary materials, the students will study the basic democratic principles, as well as the structures and functions of government in

the United States at the national, state and local levels. Democratic values and citizen participation in government are emphasized to help prepare students become responsible voters.

*Required Course – Standard Diploma

++Required Course – Virginia Modified Diploma when applicable.

Social Studies - Maryland

***United States and Maryland Government - General**

1

Credit

Grades 9

Prerequisite: None

This course content consists of the following units: foundations of the American Constitution, structures and powers of the three branches of government, civil rights, government regulation of the economy and the welfare state, political parties and voting behavior, defense and foreign policies as well as state and local governments. Democratic values and citizen participation in government are emphasized to help prepare the students to become responsible voters.

++United States and Maryland Government - Modified

1 Credit

Grade 9

Prerequisite: None

This course is designed for students who need adaptations to the curriculum. It is taught through the use of carefully controlled vocabulary and appropriate texts, as well as relevant supplementary materials. The students will study the basic democratic principles, as well as the structures and functions of government in the United States at the national, state and local levels. Democratic values and citizen participation in government are emphasized to help prepare students to become responsible voters.

***World History and Geography I - General**

1

Credit

Grades 10 & 11

Prerequisite: None

This course combines world history, geography and culture of our global neighbors into one comprehensive course. The students will learn the history

of the people, as well as the geography of the lands they study. They will learn to understand and appreciate other cultures and also obtain a grasp of the economic issues of the day.

***World History and Geography I - Modified**

1

Credit

Grades 10 & 11

Prerequisite: None

This course is designed for students who need adaptations to the curriculum. It combines world history, geography and culture of our global neighbors into one comprehensive course. The students will learn the history of the people, as well as the geography of the lands they study. They will learn to understand and appreciate other cultures and also obtain a grasp of the economic issues of the day.

***United States History - Modified**

1 Credit

Grades 11 & 12

Prerequisite: World History and Geography

This course is for students who need curriculum adaptations. The course is designed to provide the students with a chronological background of the historical evolution of our nation. Instruction is provided from the colonial period to the present day. Political, social, economic and geographic developments are discussed. Past events are related to current happenings to provide a perspective for the analysis of contemporary affairs. Emphasis is placed on helping students develop skills in remembering facts, improving reading comprehension, increasing vocabulary and improving their ability to understand facts and concepts that are consistent with material taught in the general class. The pace and depth of the material are reduced.

***United States History - General**

1 Credit

Grades 11 & 12

Prerequisite: World History and Geography

This course is designed to provide the students with a chronological background of the historical evolution of our nation. Instruction is provided from the colonial period to the present day. Political, social, economic and geographic developments are discussed. Past events are related to current happenings to provide a perspective for the analysis of contemporary affairs.

*Required Course – Take either General or Modified

Social Studies – West Virginia

***World Studies to 1900 - General**

1 Credit

Grades 9

Prerequisite: None

This course content consists of the following units: Empire Building, Reformation, River Valley Civilizations, and World Religions. Students will measure the success of economic, political, and military systems and determine their impact on the foundation of an empire. Additionally, students will validate the historical impact of significant groups, individuals, places, and documents of the Reformation on the cultural, economic, and political systems in place during that time period. Students will research and evaluate the geographic features, climate, significant groups, individuals, places and events that impacted the development and/or the destruction of the ancient river valley civilizations. Furthermore, students will examine the world's five major religions to gain insight on how the beliefs of a particular religion influence the behaviors of its believers.

++ World Studies to 1900 - Modified

1 Credit

Grade 9

Prerequisite: None

***US Studies to 1900 - General**

1 Credit

Grades 10

Prerequisite: World Studies

This course content consists of the following units: America Transformed, Civil War Era, From Englishmen to Americans, and Settling America. Students will examine the push/pull factors that led to immigration, the patterns of immigration, and their effects on emerging America, analyze the factors that led to the American Revolution and the effects it had on the establishment of the Republic, examine issues leading to the Civil War and the challenges facing the nation at the end of the war, and analyze the forces that led to the industrialization of the United States.

++US Studies to 1900 - Modified

1 Credit

Grades 10

Prerequisite: World Studies

This course is designed for students who need adaptations to the curriculum. It is taught through the use of carefully controlled vocabulary and appropriate texts, as well as relevant supplementary materials. ***20th and 21st Centuries Studies- General**

1 Credit

Grades 11, 12

Prerequisite: World Studies, US Studies

This course content consists of the following units: Conflicts and wars in the 20th-21st centuries, historical marks of intolerance, immigration in the 20th and 21st centuries, and the Civil Rights Movement. Students will examine the impact of cultures, economic systems, political systems, and advances in technology on global conflict; they will evaluate the strengths and weaknesses of these systems and defend their conclusions in a debate; research, compare and contrast acts of intolerance by examining concerns, issues and conflicts against specific ethnic, religious and racial groups exhibited by nations throughout recorded history; research United States immigration policies, the contributions of immigrants to the United States, and the impact they have had on our society and the reciprocal impact our society has had on the immigrants. Students will sort and summarize the information that they will use to prepare a presentation emphasizing the importance of a designated

immigrant group to the status of the United States today; and become effective United States citizens in a global society by understanding the fundamental democratic principles represented by the Civil Rights Movement, evaluate the outcomes and respect the sacrifices that were made by so many selfless individuals for the rights of others.

++20th and 21st Centuries Studies- Modified

1 Credit

Grades 11, 12

Prerequisite: World Studies, US Studies

This course is designed for students who need adaptations to the curriculum. It is taught through the use of carefully controlled vocabulary and appropriate texts, as well as relevant supplementary materials. This course content consists of the following units: Conflicts and wars in the 20th-21st centuries, historical marks of intolerance, immigration in the 20th and 21st centuries, and the Civil Rights Movement. Students will examine the impact of cultures, economic systems, political systems, and advances in technology on global conflict; they will evaluate the strengths and weaknesses of these systems and defend their conclusions in a debate; research, compare and contrast acts of intolerance by examining concerns, issues and conflicts against specific ethnic, religious and racial groups exhibited by nations throughout recorded history; research United States immigration policies, the contributions of immigrants to the United States, and the impact they have had on our society and the reciprocal impact our society has had on the immigrants. Students will sort and summarize the information that they will use to prepare a presentation emphasizing the importance of a designated immigrant group to the status of the United States today; and become effective United States citizens in a global society by understanding the fundamental democratic principles represented by the Civil Rights Movement, evaluate the outcomes and respect the sacrifices that were made by so many selfless individuals for the rights of others.

***Civics for the 21st Century- General**

1 Credit

Grade 12

Prerequisite: World Studies, US Studies, 20th and 21st Centuries Studies

This course content consists of the following units: Citizenship, Global Awareness, and Global Economic systems. Students will demonstrate the roles of citizenship in a democracy, illustrating the major responsibilities, the changing characteristics and the impact that these roles and responsibilities can have on society as well as government; gain an understanding of the complexity of issues facing the world community and methods that can be

used to resolve those issues; and examine and evaluate various economic systems and the interdependence of global economies.
